CAREER OBJECTIVE

Full-stack web developer with a B.Sc. in Computer Science & Engineering (CGPA 3.47) from the University of Asia Pacific, and hands-on production experience at Eutropia IT Solution. Specializes in building server-first Next.js applications with Express/TypeScript/Prisma backends, including authentication (Google OAuth, JWT), payment integration, and role-based access control. A Champion and Runner-up at Innovatex 2025, with a track record across 7+ national hackathons. Known for fast learning, ownership of features end-to-end, and writing clean, modular, production-grade code.

SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Next.js, React.js, Express.js, Node.js, Django REST Framework
- **Database & ORM:** PostgreSQL, Prisma
- **Styling & UI:** Tailwind CSS, shadcn/ui, Radix UI
- **Tools & Platforms:** Git, GitHub, Vercel, Postman, VS Code, SSLCommerz Payment Gateway
- **Interpersonal Skills:** Problem-Solving, Team Collaboration, Time Management, Communication, Adaptability

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Eutropia IT Solution *[February, 2026] – [June, 2026]*

- Developed and maintained responsive web interfaces and backend features for client projects, including the corporate company website.
- Implemented core features for the Medicine Mart e-commerce platform, including product listing, cart, and order-related functionality.
- Collaborated with the design and backend teams to deliver features on schedule while following company coding standards.

Full-Stack Developer (Frontend Focused) — Datavro BD *[January, 2026] – [February, 2026]*

- Built and styled frontend components using React.js and modern CSS practices.
- Worked closely with senior developers to translate design mock-ups into functional interfaces.

PROJECTS

GearUp — Gear Rental Platform | Live Site | Frontend Repo | Backend Repo

A full-stack rental marketplace where users can list, browse, and rent outdoor and event gear online, with secure payments and role-based dashboards for customers, providers, and admins.

- Role-based dashboards for Customers, Providers, and Admins with distinct rental and listing management flows.
- Integrated SSLCommerz payment gateway for secure end-to-end online transactions.
- Built a RESTful API with Express, TypeScript, and Prisma/PostgreSQL covering auth, gear listings, rentals, and reviews.
- Deployed on Vercel with a custom CI build pipeline, CORS configuration, and serverless-compatible architecture.

Medicine Mart — E-commerce Feature Implementation

An online medicine ordering platform built during my role at Eutropia IT Solution, where I implemented key customer-facing features to improve the shopping and ordering experience.

- Implemented product catalog, search, and category filtering for medicines and health products.
- Built cart and checkout flow with quantity management and order summary.
- Improved page responsiveness and UI consistency across devices.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE)

University of Asia Pacific — CGPA: 3.47 / 4.00

EXTRA-CURRICULAR ACTIVITIES

- Innovatex 2025 — Champion and Runner-up in separate categories (National Hackathon).
- Participated in 7+ national-level hackathons and programming competitions.
